eHawaiiGov – Hawaii's Online Solution

Citizens deserve it. Businesses demand it. But how to deliver information to the people has been the challenge of the Hawai'i state government since its creation in 1959. Not any more. Now, information is accessible, accurate and instantly available at one convenient website—www.ehawaii.gov.

Since its inception in January 2000, eHawaiiGov has been developing, designing, and managing the internet portal for the state of Hawai'i, making information not only available to the citizens of the state, but to worldwide audiences as well.

In addition to maintaining the state's portal website, eHawaiiGov works behind the scene to assist agencies and other government entities in developing highly specialized applications to make state government more efficient and, in turn, save taxpayers money. Here are a few examples of eHawaiiGov systems at work:
- Online Annual Business Filings
- Certificate of Good Standing Online Purchase
- Online Initial Business Filings
- Online Electronic Tax Filings
- Online Professional and Vocational License Renewals
- Online Jury Pool Information

We help state agencies create visually appealing, informative, and user-friendly sites. By utilizing new software technologies to deliver government services, Hawai'i is reaping the vast rewards of living in the computer age. And the best is yet to come.

Get Online, Not In Line

As an added convenience, eHawaiiGov offers services to citizens and businesses who want the convenience of instant information without leaving the home or office.

Working Toward a More Accessible Government

eHawaiiGov operates under the authority of Hawai'i code with the responsibility of assisting the state in exploring and improving citizen and business access to public information. Our goals include expanding the base of users who can access public information as well as increasing the amount and availability of public information and transactions with the state of Hawai'i. Please visit www.ehawaii.gov for more information.
